SUMMARY —

As an experienced Front End Web Developer with **4** years in the field and a focus on **ReactJS** for over four years, I excel in converting complex concepts into intuitive web applications. I am keen on tackling challenging projects, applying my technical skills to innovative developments, and I am constantly exploring creative solutions to improve user experiences in the ever-evolving frontend technology landscape.

TECHNICAL COMPETENCIES

Languages : JavaScript, TypeScript

Web Dev : ReactJs, NodeJS, NextJS, HTML, CSS, Tailwind

State Management : Redux

Version Control : Git

Project Management : JIRA

Development Methologies : Agile

RECENT EXPERIENCE

CBNITS　　　　　　　　　　　　　　　　　　　　　　　　　　　　　**Oct 2022 – Present**
Front End Developer- ReactJs

Client: Liberty Mutual

– Responsible for the front end maintenance and development of new features of an insurance Organization.
– Created a new version of payment portal with link to **CashFree integration** as well as **Gpay** .
– Created the entire V2 of the Application from scratch and responsible for increasing the performance metrics by **73**
– Collaborated with cross-functional teams to streamline IT processes and improve efficiency

Client: Cloud Armor (now Swift Security)

– Started from scratch and developed a cloud security platform in ReactJS.
– Used **highcharts library** for data visualization and **risk analysis** of potential threat
– Used **Axios** as well as **Redux** for Handling data fetching and data manipulation smoothly
– Implemented **RBAC (Role Based Access Control)** for different UI elements and functionality.

Client: Zeullig Pharma

– Worked on a Healthcare app in South Eastern Asia which has a 2.5 million monthly users
– **Redux toolkit** features such as **slice** and **thunk** were used to store and manipulate data. To manage the load time of the application, used **dynamic bundling**
– Conducted **capacity planning** and **scalability assessments** to support future growth
– Provided on-call support for critical issues and worked on root cause analysis for incident resolution

Kreeti Technologies　　　　　　　　　　　　　　　　　　　　　　　**Mar 2022 – Oct 2022**
Front End Developer- ReactJs

– Developed a Job search and Listing Web application helping employers to create job posts, manage candidate applications, conduct video interviews, and analytical dashboard for job post management with an end to end hiring process
– Oversaw migration of critical business applications to cloud-based platforms
– Used React along with **redux toolkit** such as thunk and slice to manipulate redux store in the app Job Alley .
– Implemented **multi-factor authentication** for easier authentication
– Participated in various phases of feature delivery from user story grooming, preparing prototypes, feasibility checks, design reviews, implementation, and testing.
– Responsible for developing multiple features for the employer portal, worker application, and video interviews.

Wipro　　　　　　　　　　　　　　　　　　　　　　　　　　　　　**Sept 2020 – March 2022**
Project Engineer

– Troubleshoot and analyze problem reports to help determine root cause of the reported issue and was able to increase the efficiency of the approval portal by 30
– Used Redux in frontend for state management
– Updated styles of the Payment Portal

EDUCATION

RCC Institute of Information Technology　　　　　　　　　　　　　　**2016-2020**
B.Tech
